

Archiving just got a lot easier:

Thunderbolt LTO Tape and P5 Archive Help to Make Space and Take Control.

High performance storage is always scarce. Archiving creates space, reduces the risk of data loss and avoids the hassle of constantly having to increase storage. Archiving also reduces the cost of storage since tape offers the lowest cost per TB of any medium. Archiving keeps all completed productions in one place. Browse and search anything anytime.

Every Mac with Thunderbolt™ can now be connected directly to mTape LTO-8 drive by mLogic.

mLogic is the world's first and only manufacturer to offer a Thunderbolt LTO drive. Combined with **P5 Archive**, the result is an easy, robust and scalable solution. Access and configuration via browser make it flexible and offer insight wherever you are. P5 supports all LTO drives and libraries, making it the ideal combination for saving your data.

Enhanced LTFS Support with P5 Archive

Archiware developed its own LTFS driver to provide an optimized, efficient and robust LTFS service.

Feature	P5 Native Format	LTFS Format
Single drive and library support	✓	✓
macOS, Windows, Linux	✓	✓
Spanning large files across two tapes	✓	✓
Verify by checksum comparison	✓	✓
P5 Companion for drag-and-drop archiving	✓	✓
